

## THE CHALLENGE

Scaling their supply chain, reducing costs, consolidating their warehouse business, and finding a partner that could solve their logistical challenges, ensuring that their products got to clients safely and on time.

# FOOD EQUIPMENT SUPPLIER CASE STUDY

**About Client** A leader in supply of food equipment and systems.

**The Solution** In order to support our client's success, 3PL led the coordination and support within the supply chain. In particular, our unique fulfillment team sourced and managed the coordination of 3 regional specific partners that supported the Canadian operation, using our transportation systems to drive updated, near real time tracking/tracing, reporting and document retrieval. This included significant technological support of our client, including building and new Electronic Data Interchange (EDI) integrations, and new tracking functionality to ensure that our client delivered their products on time- and with complete visibility.

## Why Choose Us?

We can increase efficiency

We can reduce costs

We can maximize volume

# FOOD EQUIPMENT SUPPLIER CASE STUDY

## THE RESULT

The results of this work were significant. Through our work, 3PL played a major role helping our client continue to deliver globally, on time, and at scale.

We enabled our client to increase the volume moving through their network while also enabling them to reduce their required number of distribution centers (DC). We also took over fulfilling orders directly from an Ohio manufacturing center, providing timely and competitive supply chain modelling.

Together, 3PL links leveraged its structured supply chain solutions and logistics services to reduce client operational and administrative overhead costs, while leading the efficient movement of goods cross border within North America. By using our suite of services, our client, a leader in their space, was able to rely on our experience team and world class technology for coast-to-coast distribution, driving efficiency within their supply chain and enabling real time decision making.

**OUR TEAM HAS  
THE SCALE AND  
ABILITY TO  
ENABLE YOU TO  
WIN  
IMMEDIATELY**
